<b>Office Action Summary</b>	<b>Application No.</b> 10/529,362	<b>Applicant(s)</b> KAKEMURA ET AL.	
	<b>Examiner</b> ELIZABETH A. BURKHART	<b>Art Unit</b> 1792	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a deposition method.

Group II, claim(s) 6-11, drawn to a deposition apparatus.

Group III, claim(s) 12-17, drawn to a measuring method and measuring apparatus.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II have the common technical features of "plasmating a mixture gas, the mixture gas consisting of a monomer gas and an oxidizing reactive gas, and for forming a thin film made of an oxide on a substrate". Groups I and III have the common technical features of "plasmating a mixture gas, the mixture gas consisting of an oxidizing reactive gas, and for forming a thin film made of an oxide on a substrate". Groups II and III have the same common features as Groups I and III. These features do not make a contribution over the art since Ito et al (JP2000-255579) teaches plasmating a mixture gas, the mixture consisting of an organosilicon monomer and an oxidizing gas to form a silicon oxide layer ([0036], Abstract, reference submitted by applicant in IDS filed 12/19/06), and thus do not constitute special technical features.

A telephone call was made to David Pitcher on 5/29/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
